

# HONEYCOMB MONOLITH 750

## Size

This template is 100% scale/full size, and must not be re-sized or scaled.

## Shapes

-  **Bleed lines**  
Artwork must extend to these lines. Any space between these lines and the safe area lines must only be used as quiet areas.
-  **Finished lines**  
Perimeter of the face and base panels.
-  **Safe area lines**  
Important content (text, logos etc.) must be kept within these lines.
-  **Fold lines**  
Where the panels are folded.
-  **Base slot**  
Face panel will slot into this cutout section. Not usable or visible.

## Layers

-  **Design.** Must be used to create and supply your design.
-  **🔒 Guide.** Must not contain any of your design elements. Must be deleted before saving your print-ready file.

## Artwork Requirements

Artwork must be supplied:

- At the exact size of this template
- With all fonts outlined
- With all images embedded
- With all design elements on the Design layer
- With all important content inside the safe area(s)
- With background/quiet content all the way to the bleed line(s)
- With none of the template guide lines included/flattened
- With all template elements and text removed
- With no crop marks, bleed marks, colour bars or other registration marks present
- As either PDF (preferred), AI or EPS format
- With artwork for both face and base included
- With exported files checked (e.g. in Adobe Acrobat/Reader) that all design elements are included as intended, template elements are not included, and all above requirements are met

For a full list of artwork requirements and further details, please refer to our website.

## Considerations

When assembled, the face panel is partially folded, with each side of the panel displayed at 15 degrees towards the rear. While this usually doesn't need to alter the way a design is created, you may wish to factor this into your design.

Bear in mind that both the face and base panels are folded down for packing and transport. While the fold lines do not obscure any content themselves, they do leave some visible creasing, so we would recommend not positioning any small text or details that traverse these lines.

While the majority of the base panel can be used for your design, remember that the rear portion will be obscured by the face panel.

## **FACE**

**Please refer to the instructions on the first page.**

**All artwork elements must be supplied on the Design layer. The Guide layer must be deleted before saving your print-ready file.**

**This text and all other template elements and guide lines must be either deleted or not provided in your print-ready file.**
